

## ABB / Wimmer Systems ABB Spreadsheet Validation Process Training

### **ABB Spreadsheet Validation Process Training Course**

The ABB Spreadsheet Validation Process training course is non-assessed and provides attendance-training certificates.

This course is recommended following a few weeks of using DaCS™. It provides a full validation process for validating spreadsheets based on the ABB/Wimmer Systems process. This course is provided using the ABB process, but is designed to allow flexible inclusion into your own documentation, validation, and QA policies and practices.

The course overview is as follows.

- A 2-day course taught by one ABB Process Solutions consultant specialized in spreadsheet validation.
- An interactive course designed for spreadsheet owners and validation/QA teams responsible for developing and validating spreadsheets.
- The course covers all aspects of validating spreadsheets. It covers the following major subjects.
  - Generating User Requirements Specifications
  - Spreadsheet Development (or reformatting).
    - For Excel requirements
    - For DaCS specific requirements
  - Generating Functional Specifications
  - Spreadsheet Qualification
- The course covers the importance of ensuring efficiency in the process, introducing a range of process techniques and project learning experiences. It recognizes that the spreadsheet validation component of the project is the most demanding and resource consuming part of the project and passes on ABB's experience in this field.
