

# Regulatory Compliance and Validation Services

Companies regularly use Excel spreadsheets for data manipulation, data storage, and data reporting. DaCS™ is well recognised as the leading spreadsheet compliance environment and ABB offer worldwide training courses to ensure trouble free use and administration of your DaCS™ system.

## ABB Spreadsheet Compliance DaCS™ Training Courses

ABB provide three levels of training for Compassoft DaCS™ and are recognised as the leading service provider for spreadsheet services in regulated industries.

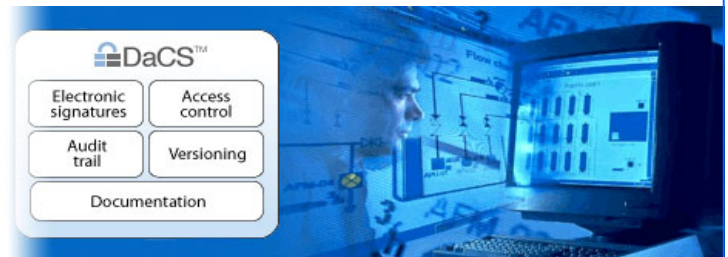

Training is provided at the following levels:-

DaCS™ User Training.

DaCS™ Administrator Training.

DaCS™ Programmer Training.

ABB provide a worldwide training service, supplying on-site or remote web based training courses to allow you to configure and get operational with DaCS™ in as short a time as possible. Courses are provided by experienced DaCS™ administrators, with in-depth knowledge of using the DaCS™ environment for regulatory control.

### Training Benefits

- Expert trainers with over 4 years experience in providing DaCS™ solutions to end users to ensure your answers and needs are understood and solved.
- ABB regional support for multi-language training no matter where you are located in the world.
- Targeted training to focus on your individual application of DaCS™ and spreadsheet use.
- Choices of on-site or remote training to fit your needs and availability.
- ABB are the only supplier of DaCS™ Programmer Training courses, allowing train the trainer project options.

## DaCS™ User Training

This course is HIGHLY recommended at the beginning of any DaCS™ project and can be combined with the Administrator Training Course on consecutive days. It ensures that all potential users are fully aware of the use of DaCS™ and the functionality and benefits the software offers in your chosen environment.

- A 2-hour course taught by one ABB consultant specialised in DaCS™ use.
- An overview and introduction to DaCS™ and the way in which DaCS™ will be used in your environment.
- Opportunity to discuss your spreadsheets and what you need from them in the DaCS™ environment.

## DaCS™ Programmer Training

ABB offer two specialised training courses for DaCS™ programming.

The courses provide the follows.

- The ability for end users to maximise macro usage within the DaCS™ environment, providing full audit traceability of routines such as macro use and data import and export.
- The ability for end users to integrate DaCS™ into existing systems, workflows and data processing activities.

## DaCS™ Administrator Training

This course ensures that the relevant team is fully aware of the most effective and efficient way to use DaCS™ in your chosen environment.

The course overview is as follows.

- A 1-day course taught by one ABB consultant specialised in technical aspects of DaCS™.
- An interactive course designed for future DaCS™ administrators and DaCS™ installation staff.
- The course covers the fundamentals of installing and configuring DaCS™. This covers both the technical and compliance implication of the DaCS™ installation and environment. It covers all aspects of getting DaCS™ up and running and provides instruction on how to maintain and operate the system in routine use.
- It is recommended that all attendees have access to an individual PC with Excel and DaCS™ installed and also to the proposed live installation environment.
- The course requires prior discussion on the best way of working with DaCS™ in your proposed environment.
  - Installation location (Standalone, Server, Citrix etc.).
  - Databases types (Access, Oracle, SQL etc.).
  - Authentication method (Server, Active Directory etc.).

## ABB Services

ABB provide a full range of consultancy services for DaCS™, including maintenance, installations, spreadsheet development and testing services. For more information visit.
