

ABB And Finsbury Solutions Sign New Agreement For Supply Of DaCS™ To The Life Sciences Market.

Daresbury and London, England, 2nd February 2010.

ABB, the leading supplier of spreadsheet validation services to the Life Sciences market today announced it had signed a new multi - year agreement with Finsbury Solutions to ensure continued supply of the DaCS software.

Finsbury Solutions, is a leading supplier of spreadsheet management and control software, it acquired the DaCS software in a strategic acquisition of Compassoft's End User Computing (EUC) products in 2009.

ABB has provided spreadsheet validation solutions to the Life Sciences market since 2003, and throughout that time the DaCS software has been a cornerstone of the offering to provide 21 CFR Part 11 compliance to ABB's range of spreadsheet validation solutions.

“Our new contract with Finsbury re-enforces ABB's commitment to provide a range of turn key solutions for spreadsheet compliance in the Life Sciences marketplace. It secures access to DaCS for new and existing Life Sciences customers, and we look forward to Finsbury further developing DaCS to meet the future demands in this market”.

Jeremy Wood, Director of Finsbury Solutions comments: “We are delighted to have entered into this new agreement with ABB. Keeping tight control of critical data is imperative for Life Science companies. The combination of DaCS plus the significant industry knowledge and professional services of ABB provides a compelling solution that is available on a global basis. We have exciting plans for DaCS, with a new release already available, that provides support for the latest versions of Excel.

DaCS remains the leading 21 CFR Part 11 solution for Excel within the Life Sciences market. For more information please contact:
